

SECRET

DIRECTOR OF CENTRAL INTELLIGENCE
Security Committee

6 June 1980

MEMORANDUM FOR: Chairman, TK Modification Working Group

FROM: [REDACTED]
Security Consultant to COMIREX

SUBJECT: Cataloguing Imaging Reconnaissance
System Documents [REDACTED]

REFERENCE: TMWG Memo, [REDACTED] dated
29 May 1980, Same Subject

1. The documents listed with the TK Modification Working Group memorandum of 29 May 1980 appear to merit inclusion in those documents to be reviewed and possibly replaced to comply with APEX. [REDACTED]

2. Regarding the third paragraph and the several points raised by members of the TK Modification Working Group, the following opinions are offered:

- While it will be difficult to actually recall many of these documents, nonetheless an effort should be made to do so.

- While the existence of uncontrolled "working copies" of many of the documents will add to the difficulty in recalling "all copies", "working copies" and Xerox copies should be asked for.

• While it is probably correct that it may be almost impossible to recontrol the information contained in these documents within newly created compartments due to the proliferation of data and the lack of an audit trail on those data, over a period of time this problem should correct itself if a concerted effort is made now to recapture the source material and new books are issued.
